SPECIAL INSTRUCTIONS

All specimens listed herein are genuine and grading is believed to be better than marked.

Bid by the piece except where noted to "Bid as lot." Next sale will be soon. Lots that have been sent in for same are now being listed. Satisfied patrons bring constant requests to list their material.

There seems to be a steady demand for all commemoratives so if you have any Uncirculated pieces or complete sets send them on assured of ready sale and prompt remittances of cash. There is no delay in such matters.

I prefer to handle complete collections where possible. If you have tired of collecting, as we most of us do eventually, or need the cash for any purpose whatever, ship me your entire collection regardless of amount and let me handle it on a perfectly fair basis. I make no big pretenses but I get the results. Every lot in September sale sold complete and at fair prices.

I have purposely left prices off this auction list to see what re-action there is, if any. I had a lot of compliments on the other lists for having them priced. Old collectors do not always realize that not much over 10% of the active collectors in this country are members of the A. N. A. and I find there are thousands who have no literature. They cannot be blamed for making foolish bids.

For above reasons, I asks you to send me list of any numbers you wish to bid on in this sale and do not know their value. I will help you fairly. If there is anything offered you surely wish, make an unlimited bid. That means you get it for a few cents above any other bids. On last sale there were a number of successful bidders who secured all the pieces they wished by so bidding, and write they are in every case perfectly satisfied.

If you are not buying any coins and do not care for my lists mail me a card so stating and I will respond at once with return of postage spent. I will also appreciate names of collectors in your vicinity who would like my lists and perhaps make bids.

NEW BOOK

There are coin collectors who have other hobbies. My new book on shells (which has been my hobby for 35 years) will be out in October. This is a copy of the announcement that was sent out recently and which has brought a flood of orders. If you are one of many who think you would like to know something about shells, just pin a dollar bill to your bid sheet and copy will be sent you of first edition as soon as ready. It is now in press.

A HANDBOOK FOR SHELL COLLECTORS

A new book for those students of nature who love shells or would like to know more about them. It is cheap in price but accurate scientifically. There will be 150 to 200 pp., over 1,000 illustrations, 5 or more to a page, with the text or story set around the cut, making it easy to digest. Full information as to species, genera, approximate number of varieties in the world. List of reference books available and prices. Valuable data and instructions have been added on other invertebrates, such as Sea Growths, Corals, Starfish, etc., that are commonly met with on the sea beaches and curio stores. No other such book has ever been printed in this country. Usual trade prices to stores for quantity orders.
